

University Hospitals is a participating provider in the Lake Health Chamber Network HMO for services unavailable at Lake Health if prior approval is obtained.

There are certain services unavailable from Lake Health providers that can be obtained at University Hospitals and still be covered under your HMO plan. Before these services can be covered, your Lake Health physician must obtain prior approval from us by submitting a request for authorization before services are rendered.

Any services from University Hospitals that are not approved in advance by us, or any services that are obtained from other non-network providers, are not covered, except in the event of an emergency medical condition.
